

- MEET THE EXPERTS -

Innovative Technique for Ridge Augmentation Using SonicWeld Rx™ Rigid Resorbable Barrier System

Lecture & Hands on Training Course

Presented by KLS Martin® L.P. & BioHorizons

Washington, DC

Registration	8:30 AM
Lecture	9:30 AM
Lunch	12:00 PM
Hands on Course	1:00 PM

May 14th, 2010

Renaissance Downtown Hotel

999 Ninth Street NW

Washington, DC 20001

(202) 898-9000

- LIMITED SPACE AVAILABLE -

RSVP: Jill Johnson
jjohnson@klsmartin.com

POC: Matt Hauck
mhauck@klsmartin.com

(800) 625-1557

Guest Speaker:

Gerhard Iglhaut
Memmingen, Germany

S.O.R.G.

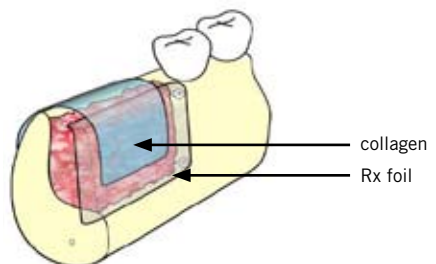

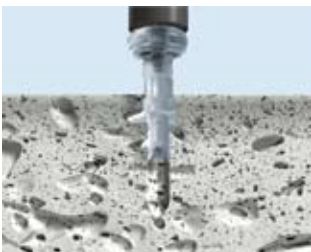

In 1989, twenty surgeons came together in Strasbourg to study and promote the use of rigid fixation techniques. The organization they formed became known as the Strasbourg Osteosynthesis Research Group, or SORG. The goals of the organization are to encourage research in the field of bone healing and osteosynthesis, educate and train surgeons in the use of osteosynthesis techniques, and act as a forum for debate and dialogue amongst surgeons and scientists from the international community. The society has grown internationally, and in 2007, the North American SORG was founded.

North American S.O.R.G. Academy Guest Speaker

Dr. Gerhard Iglhaut is from the Bavarian town of Memmingen, Germany. He is the President-Elect for the German Association of Oral Implantology (DGI) and teaches at the Georg-August-University in Gottingen, as well as the Semmelweis University in Budapest. He is also a member of the American Academy of Esthetic Dentistry. Dr. Gerhard Iglhaut has pioneered a technique of ridge augmentation utilizing a new resorbable polymer technology first introduced in cranial and maxillofacial reconstruction in 2005.

The SonicWeld Rx system is an innovative solution for space maintenance and bone fixation that utilizes resorbable polymer pins and barriers.
